A designer of

Web

Apps

Experiences

Selected Roles

2017 - Current > **Vimeo - Senior Product Designer**

Continuous design across web, mobile web, Android, iOS, Android TV and TVOs. A big role in the planning and scoping of projects. Use data to analyze user behavior and suggest changes. Do the full stack of research, planning, exploration, high-fidelity, prototype and finally specs. Inspire design team to be leaner and better at feedback.

2015 - 2017 > **The Orchard / Sony Music - Senior Product Designer**

Lead Product Designer for a variety of complex distribution, analytics, and accounting apps. Determined new style and created coded style guide to unify design language. Inspired engineering team to focus on enjoyment and engagement of our users. Interviewed stakeholders and users to determine design direction.

2013 - 2015 > **Vice / Carrot Creative - UX Designer**

Designed user interfaces, displayed information architecture for large scale websites and apps. Created advanced prototypes for desktop & mobile. Conducted heuristic evaluations, usability tests and stakeholder interviews. Created customer experience maps and annotated wireframes.

Skills, Interests, Passions

I enjoy solving problems, especially when I can flow. I like to get away from the computer to do more creative thinking. My best ideas come when I'm walking around the city or sometimes in my dreams.

Some Fun Facts:

A decade ago I spent two unpaid years serving the less-fortunate. It was one of the most rewarding experiences of my life.

I have also spent several years traveling and playing music as a professional musician. I have performed in every country in western Europe & Japan.

Currently interested in: Framer.js, Principle, Node / NPM, Max, React.js, Cinema 4D, Ableton Live, modular synthesis for audio & video.

Education

2005 Brigham Young University
BA in Communications

2003 College of Southern Idaho
AS in Human Anatomy
